AIWise Grow — GTM Technical Requirements

Document Type: Internal Technical Reference
Owner: Queenal Vrishni, Founder
Version: 1.0
Status: Active
Audience: Internal Technical Team

Purpose

This document defines the full service delivery infrastructure and build requirements for AIWise Grow's go-to-market execution. It covers all five service lines, the functional components required to deliver each, and the phased rollout logic across pre-revenue, first-close, and scaling stages.

Everything built under this spec ships under the AIWise Grow brand. No fulfillment partner names, logos, or references appear in any client-facing output.

Company Context

AIWise Grow implements custom AI systems for boutique fitness and wellness studio owners. The core value proposition: reduce operational overload so founders can focus on coaching, community, and growth.

Three offer types:

- Automation (Lead Management and Follow-Up)
- Cold Email
- Voice AI

White-label service layer (internal only): Website, SEO, AI Search, Lead Capture, Dashboards

Sales motion: Discovery call > Offer pricing > Growth Plan presentation > Close

---

Service Line 1 — Lead Management and Follow-Up Automation

What It Does

Captures inbound leads from any source and triggers a structured, multi-touch follow-up sequence without manual intervention. Handles initial contact, nurture, reactivation, and booking.

Functional Components

- CRM and pipeline management
- Trigger-based workflow automation (new lead, no-reply, reactivation)
- Form and funnel intake connected to the pipeline
- Outbound SMS and email follow-up sequences
- Automated booking and calendar integration
- Real-time lead alerts delivered to the studio owner

Build Requirements

- Dedicated sub-account per client, fully branded under AIWise Grow
- Lead lifecycle mapped end to end: new lead > attempted contact x3 > nurture > reactivation > closed won or lost
- Minimum three automation sequences built: new lead, cold lead reactivation, post-trial follow-up
- All client intake sources connected at go-live
- Pipeline view configured and accessible to client

Delivery Milestones

Milestone	**Target Timeline**
Sub-account created and branded	Day 1
Lead pipeline configured	Day 2
Intake form connected	Day 3
Automation sequences live	Day 5
Test run completed with live lead	Day 7

Service Line 2 — Cold Email Systems

What It Does

Outbound cold email infrastructure that delivers targeted, personalized outreach to prospective clients on behalf of the studio owner. Built to land in primary inbox.

Functional Components

- Dedicated sending domain per client (separate from primary business domain)
- Domain authentication setup (SPF, DKIM, DMARC)
- Domain warming protocol before first send
- Verified lead list sourced and enriched per campaign
- Personalized multi-step email sequence
- Positive reply routing into the client's pipeline for follow-up
- Ongoing deliverability monitoring

Build Requirements

- Sending domain purchased and DNS fully configured before any outreach begins
- Minimum 14-day domain warming period before first send
- Three-email sequence: intro, follow-up, soft close
- Daily send volume starts at 20, scales to 50 after week two if deliverability holds
- All positive replies routed into the client pipeline for manual or automated close

Delivery Milestones

Milestone	**Target Timeline**
Sending domain purchased and DNS configured	Day 1
Domain warming initiated	Day 1
Lead list sourced and verified	Day 5
Email sequences written and loaded	Day 7
First send live (post-warmup)	Day 14

Service Line 3 — Voice AI

What It Does

AI-powered inbound and outbound voice agent that handles lead qualification, appointment booking, follow-up calls, and reactivation without a human on the line.

Functional Components

- Inbound voice agent: greet, qualify, handle FAQs, book appointment, escalate if needed
- Outbound voice agent: follow up on cold leads, reactivate lapsed members, send appointment reminders
- Dedicated phone number per client deployment
- Call recording and transcript storage
- Pipeline integration: call outcomes logged automatically
- Live human escalation path built into every agent flow

Build Requirements

- One inbound agent and one outbound agent built per client
- All prompts written in the studio's voice and approved by the client before go-live
- Call outcomes mapped to pipeline stages: booked, not interested, voicemail, callback requested
- No agent goes live without a full internal test call reviewed by the AIWise Grow team

Delivery Milestones

Milestone	**Target Timeline**
Phone number provisioned	Day 1
Agent prompt drafted and approved by client	Day 4
Pipeline integration tested	Day 5
Internal test calls completed	Day 6
Agent live and monitored	Day 7

Service Line 4 — Website and SEO

What It Does

Conversion-first website built to turn visitors into leads, paired with an SEO foundation that builds search visibility over time. Fully white-labeled under AIWise Grow.

Functional Components

- Staging environment built and approved before go-live
- Conversion-first design with inquiry form above the fold on every key page
- Dedicated service page per client offer type
- On-page SEO: keyword mapping, page structure, meta configuration
- Local SEO: Google Business Profile optimization, directory citations, review integration
- AI search optimization: structured data and content formatted for AI-powered search results
- Blog setup for ongoing SEO content
- Lead capture form connected to client pipeline
- Fast, secure hosting with DNS management retained as partner, domain owned by client
- Full site audit before and after build

Build Requirements

- Staging build completed and client-approved before any live deployment
- One-switch go-live process with rollback capability
- All accounts and credentials registered in the client's name
- AIWise Grow retains partner-level access only

Delivery Milestones

Milestone	**Target Timeline**
Intake and scope confirmed	Day 1
Staging site built and submitted for review	Day 10
Client approval received	Day 12
Live deployment	Day 14
Post-live audit completed	Day 16

Service Line 5 — Dashboards and Reporting

What It Does

One branded live scoreboard per client showing lead volume, pipeline movement, revenue, rankings, and site performance in a single view the client can check anytime.

Functional Components

- Lead volume and source attribution
- Pipeline by stage and conversion rate
- Revenue and deals closed
- Search rankings and organic traffic
- Website engagement and form completions
- Review score and volume over time
- Call volume and outcomes
- Live data refresh minimum every 24 hours
- View-only client access via shared URL, no login required

Build Requirements

- One dashboard per client, branded with AIWise Grow and client business name
- All data sources connected and verified before delivery
- Dashboard shows real data, not placeholder data, at handoff
- Internal admin view for AIWise Grow team to monitor all client dashboards

Delivery Milestones

Milestone	**Target Timeline**
Data sources connected and authenticated	Day 3
Dashboard built	Day 5
Live data verified	Day 6
Dashboard URL delivered to client	Day 7

Shared Infrastructure

These systems support all five service lines and power AIWise Grow operations internally.

System	Purpose
Agency CRM Hub	Master account housing all client sub-accounts and pipeline data
Client Onboarding System	Intake, scoping, and delivery tracking per client
Internal Communication	Team coordination and client status updates
File Storage and Documentation	SOPs, client assets, contracts
Contract Execution	Signed before any build begins
Pricing Calculator	Generates tiered investment options using Steve Farina's complexity scale
AI Operations (Human AI OS)	Sales scripts, content, discovery, growth plans
Proposal Delivery	Branded document delivered post-growth-call

---

Phased Rollout

Phase 1 — Pre-Revenue (Now)

Focus: Infrastructure readiness and first-client delivery confidence.

- CRM agency account active and configured
- At least one automation sequence built and tested internally
- Voice agent infrastructure active with one internal test agent built
- Cold email sending infrastructure set up and warming
- Website and dashboard delivery process documented
- Pricing calculator calibrated
- All SOPs written before first client signs

Phase 2 — First Close (Clients 1 and 2)

Focus: Deliver on time, on scope, and collect the result.

- Deploy the purchased service line using Phase 1 infrastructure
- Weekly check-in with client during first 30 days
- Document what broke or took longer than expected

- Capture result metrics at day 30 and day 60
- Use results to update client-facing proof materials

Phase 3 — Scaling (Clients 3 through 5 and beyond)

Focus: Repeatability without the founder executing every build step.

- Tech VA handles sub-account setup, form connections, and dashboard configuration
- AIWise Grow team reviews and approves before client handoff
- Growth call and close handled by sales support
- Queenal focuses on discovery, strategy, and client relationship
- All five service lines available with documented delivery timelines

---

Quality Standards

Every client delivery must meet the following before handoff:

- All automations tested with a live lead before go-live
- All voice agents tested with a recorded call reviewed internally
- All websites approved on staging before live deployment
- All dashboards showing real data at handoff
- Client onboarding call completed and recorded before any build begins
- Signed contract on file before a single build step is taken

---

Open Items and Decisions Required

Item	**Owner**	**Priority**
Confirm CRM agency account tier and pricing	Queenal	High
Select preferred website build platform	Technical team	High
Finalize dashboard template design and layout	Technical team	Medium
Define client intake SOP and onboarding checklist	Queenal and team	High

Item	Owner	Priority
Build internal test environment for automation QA	Technical team	High
Confirm voice AI pricing tier for first deployment	Technical team	Medium
